

SRV PRESET COLOR SCHEME

All of our preset safety relief valves have a colored “dot” painted on them (see example, **Fig. 1**, below), according to the pressure *preset* at General Pump. Please refer to **Table 1** for color scheme and related preset pressures.

Further, they have the preset pressure stamped into the SRV body (see example, Fig. 2, below).

Table 1

PAINT COLOR	PRESSURE RANGE
YELLOW	1000 - 1999 PSI
RED	2000 - 2999 PSI
ORANGE	3000 - 3999 PSI
GREEN	4000 - 4999 PSI
WHITE	5000 - 6000 PSI

Colored dot painted on end of SRV indicates pressure preset at GP.
