GP Introduces New Hydro Excavating Nozzle

General Pump has introduced a new triple stream, hydro excavating nozzle featuring three high impact nozzles. With flows up to 30 GPM and pressures up to 4,000 PSI, excavating is made easier and safer with these urethane coated nozzles. The stainless steel body and hardened stainless nozzle inserts promise longer life, and individual nozzles are easily changed when worn. Call or fax for more information. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
