GP Introduces New “M” Series

General Pump has introduced a high-flow triplex plunger pump, the KFZ Series. The KFZ Series offers versatility with flows from 24.9 to 45.0 GPM and pressures of 3000 PSI. With its unique pressure packing cooling system, this pump can withstand the ultra high flows. The KFZ also offers a patent pending, symmetrical power end design featuring top and bottom mounting holes allowing for easy left to right shaft conversion. High volumetric efficiency suction/delivery valves featuring new spherical design of sealing areas, along with new high performance aluminum alloy connecting rods and a floating wrist pin (enabling extra load at half the weight) and patent-pending “high tech” low and high pressure seals, make these perfect pumps for any aggressive environment.
