

Safety Relief Valve

6,000 PSI

SPECIFICATIONS

| | |
|-------------------------|---|
| Maximum Volume | 6.0 GPM |
| Maximum Relief Pressure | 6,000 PSI |
| Dimensions | 2.6" L x .875" Hex |
| Weight | .325 lb. |
| Materials | Brass, Stainless Steel, Thermoplastic, Buna-N |

FEATURES

- High pressure safety valve: 1,000–6,000 PSI relief pressure
- One model fits all pressures – no springs to change
- Less “whistling” and chatter than competing brands
- Highly accurate over full range of pressures
- Fits any brand of pump
- Designed and made in the USA
- Available in 1/4", 3/8" and 1/2" NPT-M
- Available with side and end discharge
- We can pre-set; ask your GP representative

| Part Number | Hose Barb | Discharge | Inlet |
